

Ilyas Goth

6 of the 8 areas within 500 m of Ilyas Goth are in Landhi's highest-priority fifth for heat support. The highest ranks 1 of 245. The model is confident that 4 are in the top fifth; 2 move a lot when the assumptions change (dashed outline).

Provisional. The weights are placeholders until they are set by the project, and distance to a relief centre has no data yet because no centre has been verified in person. Rankings may change.

Lower priority → highest priority, within Landhi. Circle: where OpenStreetMap marks Ilyas Goth. Grey: the rest of Landhi. Lines: main roads.

What pushes these areas' scores up

- Further from the nearest clinic or hospital (8 of 8 areas)
- Little greenery or shade (5 of 8 areas)
- The ground here gets hotter on summer afternoons (4 of 8 areas)
- More people live in this area (4 of 8 areas)

Worth checking on the ground

- Where do people go to cool down, and is there drinking water there?
- How long are the power cuts here in the hot months?
- Where do older people or young children live who may struggle in the heat?
- Is the map wrong about anywhere here? That is the most useful thing to know.

Rank	Priority	Confidence	Ground °C	People*	60+ / under 5*	Green	Clinic (m)
1	Higher priority for support	confidently in	44.7	2,378	363	15%	1,540
8	Higher priority for support	uncertain	44.5	190	29	6%	2,335
14	Higher priority for support	uncertain	44.1	450	69	18%	1,997
20	Higher priority for support	confidently in	43.1	2,352	360	0%	1,751
29	Higher priority for support	confidently in	43.0	3,410	521	0%	1,599
47	Higher priority for support	confidently in	42.9	4,127	631	0%	1,296
61	Middle of the range	confidently out	43.1	300	46	4%	2,114
133	Middle of the range	confidently out	45.4	78	12	97%	1,864

What this cannot tell you. *People are modelled, and the model counts about half the people the 2023 census found in Landhi: compare areas, never read them as headcounts. Ground temperature is the surface, not the air, and says nothing about humidity. Power cuts are not included, although they are a large part of why heat harms people here. This describes areas, not the people in them, and is never a verdict on a neighbourhood.

Notes from the visit
