

Korangi Sector 29

2 of the 7 areas within 500 m of Korangi Sector 29 are in Landhi's highest-priority fifth for heat support. The highest ranks 12 of 245. The model is confident that 2 are in the top fifth.

Provisional. The weights are placeholders until they are set by the project, and distance to a relief centre has no data yet because no centre has been verified in person. Rankings may change.

Lower priority → highest priority, within Landhi. Circle: where OpenStreetMap marks Korangi Sector 29. Grey: the rest of Landhi. Lines: main roads.

What pushes these areas' scores up

- The ground here gets hotter on summer afternoons (6 of 7 areas)
- More people live in this area (4 of 7 areas)
- Little greenery or shade (3 of 7 areas)

Worth checking on the ground

- Where do people go to cool down, and is there drinking water there?
- How long are the power cuts here in the hot months?
- Where do older people or young children live who may struggle in the heat?
- Is the map wrong about anywhere here? That is the most useful thing to know.

Rank	Priority	Confidence	Ground °C	People*	60+ / under 5*	Green	Clinic (m)
12	Higher priority for support	confidently in	45.3	660	102	8%	777
19	Higher priority for support	confidently in	45.0	771	118	17%	778
58	Middle of the range	confidently out	44.5	480	74	8%	607
62	Middle of the range	confidently out	44.4	500	77	19%	788
104	Middle of the range	confidently out	43.4	530	82	13%	774
118	Middle of the range	confidently out	43.8	771	118	17%	368
147	Middle of the range	confidently out	43.0	681	105	1%	455

What this cannot tell you. *People are modelled, and the model counts about half the people the 2023 census found in Landhi: compare areas, never read them as headcounts. Ground temperature is the surface, not the air, and says nothing about humidity. Power cuts are not included, although they are a large part of why heat harms people here. This describes areas, not the people in them, and is never a verdict on a neighbourhood.

Notes from the visit
