

Landhi Sector 21

6 of the 8 areas within 500 m of Landhi Sector 21 are in Landhi's highest-priority fifth for heat support. The highest ranks 2 of 245. The model is confident that 5 are in the top fifth; 2 move a lot when the assumptions change (dashed outline).

Provisional. The weights are placeholders until they are set by the project, and distance to a relief centre has no data yet because no centre has been verified in person. Rankings may change.

Lower priority → highest priority, within Landhi. Circle: where OpenStreetMap marks Landhi Sector 21. Grey: the rest of Landhi. Lines: main roads.

What pushes these areas' scores up

- The ground here gets hotter on summer afternoons (8 of 8 areas)
- Further from the nearest clinic or hospital (5 of 8 areas)
- Little greenery or shade (5 of 8 areas)
- More people live in this area (2 of 8 areas)

Worth checking on the ground

- Where do people go to cool down, and is there drinking water there?
- How long are the power cuts here in the hot months?
- Where do older people or young children live who may struggle in the heat?
- Is the map wrong about anywhere here? That is the most useful thing to know.

Rank	Priority	Confidence	Ground °C	People*	60+ / under 5*	Green	Clinic (m)
2	Higher priority for support	confidently in	45.4	701	108	8%	1,234
3	Higher priority for support	confidently in	44.8	731	113	1%	1,459
5	Higher priority for support	confidently in	44.9	761	117	3%	1,207
12	Higher priority for support	confidently in	45.3	660	102	8%	777
27	Higher priority for support	uncertain	44.7	550	85	6%	829
31	Higher priority for support	confidently in	44.5	791	122	18%	1,011
51	Middle of the range	uncertain	44.0	460	71	21%	1,365
62	Middle of the range	confidently out	44.4	500	77	19%	788

What this cannot tell you. *People are modelled, and the model counts about half the people the 2023 census found in Landhi: compare areas, never read them as headcounts. Ground temperature is the surface, not the air, and says nothing about humidity. Power cuts are not included, although they are a large part of why heat harms people here. This describes areas, not the people in them, and is never a verdict on a neighbourhood.

Notes from the visit
