

Future Colony

None of the 9 areas within 500 m of Future Colony is in Landhi's highest-priority fifth. The highest ranks 76 of 245. The model is confident that none of them is in the top fifth.

Provisional. The weights are placeholders until they are set by the project, and distance to a relief centre has no data yet because no centre has been verified in person. Rankings may change.

Lower priority → highest priority, within Landhi. Circle: where OpenStreetMap marks Future Colony. Grey: the rest of Landhi. Lines: main roads.

What pushes these areas' scores up

- Little greenery or shade (5 of 9 areas)
- More people live in this area (4 of 9 areas)
- The ground here gets hotter on summer afternoons (3 of 9 areas)
- Below the Landhi average on every measure we track (2 of 9 areas)

Worth checking on the ground

- Where do people go to cool down, and is there drinking water there?
- How long are the power cuts here in the hot months?
- Where do older people or young children live who may struggle in the heat?
- Is the map wrong about anywhere here? That is the most useful thing to know.

Rank	Priority	Confidence	Ground °C	People*	60+ / under 5*	Green	Clinic (m)
76	Middle of the range	confidently out	43.9	560	86	3%	607
118	Middle of the range	confidently out	43.8	771	118	17%	368
150	Lower priority for support	confidently out	43.3	821	127	4%	191
172	Lower priority for support	confidently out	42.9	751	116	1%	185
181	Lower priority for support	confidently out	42.6	480	74	1%	425
198	Lower priority for support	confidently out	42.5	540	83	1%	250
213	Lower priority for support	confidently out	42.5	709	109	50%	535
219	Lower priority for support	confidently out	42.4	100	15	25%	514
244	Lower priority for support	confidently out	40.7	80	13	94%	589

What this cannot tell you. *People are modelled, and the model counts about half the people the 2023 census found in Landhi: compare areas, never read them as headcounts. Ground temperature is the surface, not the air, and says nothing about humidity. Power cuts are not included, although they are a large part of why heat harms people here. This describes areas, not the people in them, and is never a verdict on a neighbourhood.

Notes from the visit
